REVIEW
OF OPTOMETRY

How many other lenses can say they're more comfortable than ACUVUE® OASYS® Brand Contact Lenses?

NONE.

In published clinical studies and those registered on clinicaltrials.gov,
**ACUVUE® OASYS® Brand has never been beaten
for comfort by any leading monthly lens.***

Visit acuvuepro.com
to learn more about
ACUVUE® OASYS® Brand Family.

*Based on review of published clinical studies and those registered on clinicaltrials.gov with comfort as an endpoint.

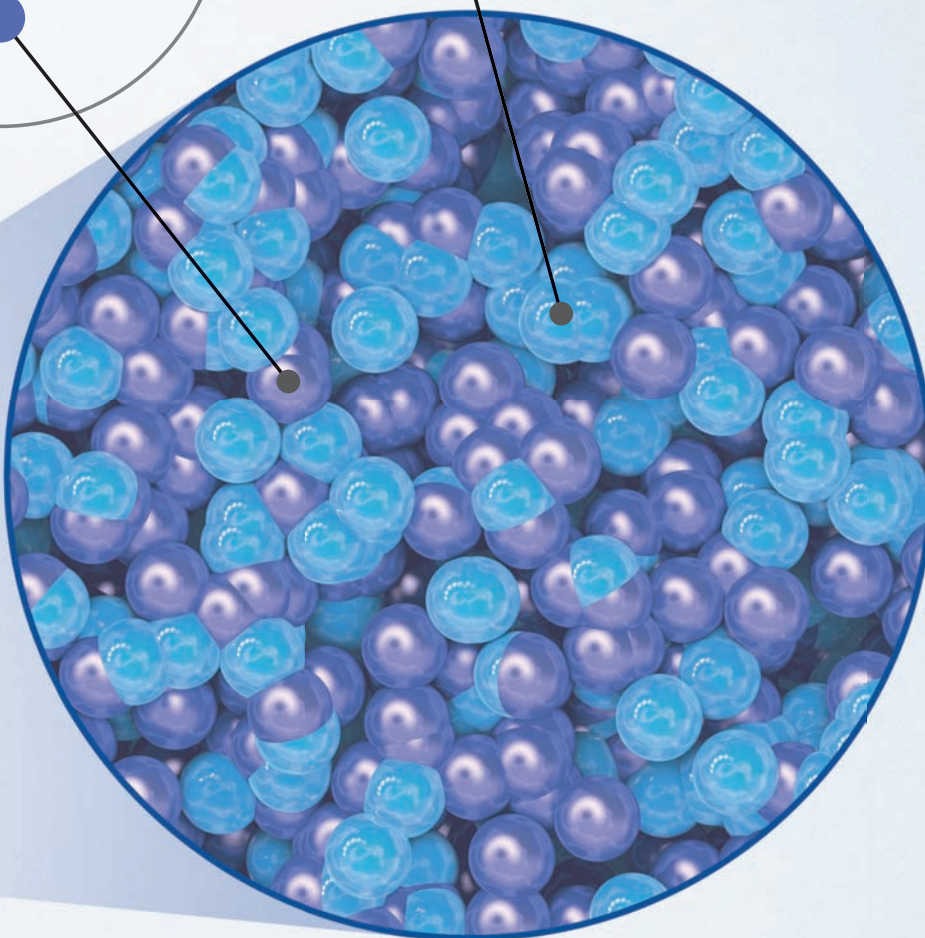

ACUVUE® Brand Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Lenses should not be prescribed if patients have any eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. Consult the package insert for complete information. Complete information is also available from VISTAKON® Division of Johnson & Johnson Vision Care, Inc., by calling 1-800-843-2020 or by visiting acuvueprofessional.com.

ACUVUE®, ACUVUE® OASYS®, HYDRACLEAR®, and VISTAKON® are trademarks of Johnson & Johnson Vision Care, Inc.

Welcome

The Pursuit of Education Elevates and Inspires Us All

As clinicians, our top priority is our patients. Continuing education is important in any profession, but for doctors it is especially critical because new ideas and technology are constantly evolving and changing the way we practice. CE empowers us and gives us the vital knowledge necessary not just to stay up-to-date, but also to improve

our patients' health and their quality of life.

Compared to other providers of health care, an optometrist's educational needs are unique. In recent years, expanded scope of practice laws have been enacted in a majority of states. These advances are much overdue, and the recognition invigorates us as a profession. Still, these new opportunities raise the bar on what is expected of us.

Continuing education is the bridge that can help us get there.

As ophthalmologists focus more on surgery, our primary eye care and clinical responsibilities are becoming greater. This inexorable trend offers yet another exciting opportunity for us to become the main eye care provider for our patients.

With this in mind, *Review of Optometry* is pleased to present its first Conference Planner, a comprehensive list of continuing education opportunities offered in 2014—from intimate one-day

meetings for local audiences to the big conferences spanning multiple days that draw national and international attendees. Looking over the nearly 200 events planned for 2014, one can't help but marvel at the effort and energy with which our profession's leaders have responded to the CE challenge. It is truly admirable and inspiring.

Jobson and Review of Optometry have a long history of offering optometric CE, including clinical articles in the magazine and as host of informative continuing education meetings where some of the brightest minds in eye care offer their insights on myriad clinical topics.

In 2014, *Review of Optometry* will continue to offer its "New Technologies and Treatments" meeting series, which will be held in numerous locations across the US (for details, visit www.revoptom.com/conferences). During these meetings, attendees learn about the latest therapeutics and technologies available to diagnose and treat ocular diseases.

We hope this 2014 Conference Planner will be a helpful resource as you plan your continuing education efforts for the coming year.

Sincerely,

Paul Karpecki, OD
Chief Clinical Editor

and the Blue Light Hazard

Blue light plays a paradoxical role in health and vision. Not only is blue light essential for color perception, recent research has found that light in this band triggers critical physiological responses that include pupil constriction reflex and synchronization of the human biological clock. However, blue light may also be damaging to the eye, and the term “blue light hazard” has been coined to describe the danger this light presents to critical structures within the eye. Blue light can induce formation of damaging phototoxins, leading first to the death of critical retinal pigment epithelium (RPE) cells and then to photoreceptors. This damage is cumulative, and has been implicated in the development of retinal degenerative diseases such as age-related macular degeneration (AMD). The fact that blue light is both beneficial and harmful raises a critical question: Can we protect the eye from harmful blue light without simultaneously denying it the beneficial blue light? One way to accomplish this would be the creation of a lens that would selectively filter out the harmful wavelengths while transmitting the beneficial ones.

To determine if specific bands within the blue light spectrum

were responsible for blue light’s phototoxic effects, researchers from Essilor’s Paris R&D laboratories joined forces with scientists from the Paris Vision Institute - one of the most important research centers in Europe on eye diseases—to develop a unique illumination system that allowed cultured swine retinal cells to be exposed to narrow bands of light. Using this test system, it was discovered that RPE phototoxicity was concentrated in a relatively narrow band, separate from the wavelengths necessary for the beneficial physiological effects of blue light. This finding paved the way for **selective photofiltration**: the creation of lenses that reduce the level of exposure to the harmful portion of the blue light spectrum, ranging from 415-455 nanometers (known

as Blue-Violet light) while permitting the rest of the visible spectrum including beneficial blue light (known as Blue-Turquoise light), to enter the eye at a normal level. Thus, the eye’s necessary visual and non-visual functions can be maintained while exposure to hazardous wavelengths is reduced.

Crizal® Previncia™ No-Glare lenses with Light Scan™

represent the first application of new patented technology¹, that enables selective filtration of harmful light – both Blue-Violet (BV) and Ultraviolet (UV) – while allowing beneficial light to pass through and maintaining exceptional transparency at all other visible-

light wavelengths. In fact, Crizal Previncia No-

Glare lenses reduce the quantity of harmful

Blue-Violet light reaching the eye by

20%. Unlike common yellow-tinted

“blue blocking lenses,” Crizal

Previncia No-Glare lenses cause

minimal color distortion—

indeed, these lenses are almost

perfectly clear. Designed to

selectively block harmful

blue light while preserving

transmittance of beneficial blue

light, Crizal Previncia No-Glare

lenses offer the most selective eye

protection on the market today.

Additionally, Crizal Previncia No-Glare lenses

also feature an Eye-Sun Protection Factor (E-SPF®) of 25, which means they provide

25 times more UV protection for the eye than wearing no lens at all. Integrating Essilor’s superior No-Glare technology, Crizal® lenses are easy to clean, resistant to smudges, scratches, dust, and water, and protect against distracting glare and reflections. Maintaining excellent transparency, Crizal Previncia No-Glare lenses offer optimal vision at all times.

1. Covered under U.S. Patent No. 8,360,574. Additional U.S. and foreign patents pending.

Review of Optometry Presents New Technologies and Treatments in Vision Care

As busy clinicians, the opportunities to discuss and share with colleagues the finer points and unique insights on how you practice your craft are often infrequent. This is one of the reasons Review of Optometry will continue to offer its New Technologies and Treatments series, which will provide an interactive forum to discuss new pharmaceuticals and instruments that are continuing to evolve and move the profession forward.

“One unique aspect of these innovative meetings is their informal nature, which acts as a catalyst to spur conversation amongst colleagues,” says optometrist Paul Karpecki, education meeting chair. “The collaborative experiences available to us at well-focused CE conferences are precisely how we improve and hone our clinical acumen, both individually and collectively as a profession.”

Five meetings in all will be held in 2014. Some topics to be featured during the New Technologies and Treatments meeting series will include glaucoma diagnosis and management, anterior segment grand rounds, technological innovations in eye care, ocular manifestations of systemic disease, ocular surface disease diagnosis and treatment, new pharmaceuticals and ocular nutrition. The educational faculty includes many of the thought leaders in the profession.

“As education chair, I have seen first-hand how education has flourished at these informal settings, and when

the meetings conclude, we have returned to our practices invigorated with renewed fervor for patient care,” Dr. Karpecki adds.

The meeting series will be held throughout the year at these locations:

- **Jan. 16-19, Palm Beach, Aruba**, at the Westin Resort & Casino, with faculty that includes Jimmy Bartlett, OD, Ben Gaddie, OD, and Kimberly Reed.

Fourteen CE credit hours will be available.

- **May 2-4, La Jolla, CA**, at the Hilton La Jolla Torrey Pines, with faculty that includes Jeffrey Gerson, OD, Ron Melton OD, and Randall Thomas, OD. Fifteen CE credit hours will be available.

- **June 19-22, Orlando, FL**, at Disney’s Yacht & Beach Club, with faculty that includes Steve Ferrucci, OD, Marc Bloomenstein, OD, and Doug Devries, OD. Fourteen CE credit hours will be available.

- **July 17-20, Minneapolis, MN**, at the Hilton Minneapolis, with faculty that includes Paul Ajamian, OD, Joseph Shovlin, OD, and Robert Wooldridge, OD. Fourteen CE credit hours will be available.

- **Sept. 12-14, Tysons Corner, VA** (Washington, DC area), at the Sheraton Premiere, with faculty that includes Al Kabat, OD, Derek Cunningham, OD, and Mark Dunbar, OD. Fifteen CE credit hours will be available.

THE TRAINING YOU NEED TO GROW YOUR MEDICAL PRACTICE

Attention All Optometrists

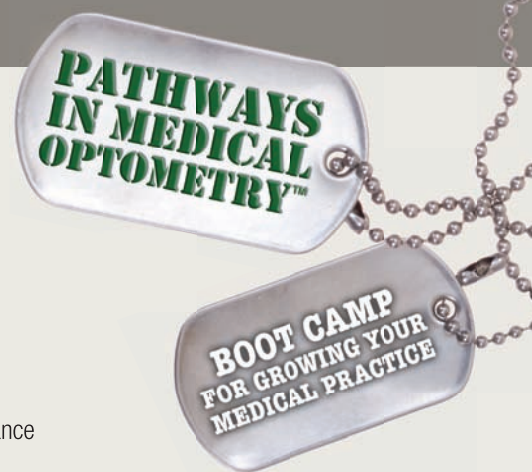

Attend a boot camp to receive a step-by-step implementation plan that will take your practice to the next level by:

- Taking charge of your schedule
- Determining vision plan vs medical plan
- Gaining access to insurance panels
- Improving billing and medical records
- Understanding ICD-10 codes
- Maximizing practice productivity and performance

Expert faculty:

Scot Morris, OD, FAAO
John Rumpakis, OD, MBA
Allergan Eye Care Business Advisors

Register today at AllerganODPathways.com

Being able to soak up sun, sights and education is a wonderful experience, especially if the venue is a luxury cruise ship. Be sure to explore these CE cruise opportunities scheduled in 2014:

• **Women of Optometry Spa**

Cruise to Bermuda: Jan. 30-Feb. 14 aboard the Celebrity Constellation. Earn eight CE hours and sit in on courses presented by optometrists Kimberly Reed, Louise Sclafani and Christine Sindt, who will cover topics on contact lenses and systemic disease. Hosted by AEA cruises, www.OptometricCruiseSeminars.com.

• **Southern Caribbean Cruise**

Seminar: Feb. 15-22 aboard the Celebrity Summit. Gain 10 hours of CE and listen to courses by Charles Ficco, OD. Hosted by AEA Cruises, www.OptometricCruiseSeminars.com.

• **Eastern Caribbean Cruise Semi-**

nar: Feb. 16-23 aboard the Royal Princess. S. Barry Eiden, OD, is the headliner for this cruise, where attendees can earn up to 10 CE credits. Hosted by AEA Cruises, www.OptometricCruiseSeminars.com.

• **Mediterranean Cruise Seminar**

from Athens to Venice: May 10-19 aboard Silversea's Silver Wind. Ten CE credits will be available, with presentations by Louise Sclafani, OD, and Mark Rosanova, MD. Hosted by AEA Cruises, www.OptometricCruiseSeminars.com.

• **Alaska Inside Passage Cruise**

Seminar: June 29-July 9 aboard the Grand Princess, where 10 hours of CE will be available. Hosted by AEA Cruises, www.OptometricCruiseSeminars.com.

**Feb. 14-16, Kansas City
53rd Annual Heart of America
Contact Lens Society Congress**

HOST: Heart of America Contact
Lens Society
KEY FACULTY: Jimmy Bartlett, Randy

• **Paris/Normandy/Seine River**

Cruise Seminar: July 3-10 aboard the AmaWaterways Amalegro. Attendees will be able to obtain 10 CE credits in courses given by Peter Kehoe, OD. Hosted by AEA Cruises, www.OptometricCruiseSeminars.com.

• **Splendid China 2014 CE:** July

5-18 cruise to Hong Kong, Guilin, Chengdu and Tibet. Featured speakers include Joseph Pizzimenti, OD, and Mile Brujic, OD. Twenty-four hours of CE credit will be available. Topics will be allergy, comanagement, contact lenses, corneal/conjunctival disease, corneal surgery, cataract surgery, diabetes, dry eye, nutrition and the eye, ocular infection, optical dispensing, pharmacology, practice management, retinal disorders, refractive surgery and systemic disease. Hosted by iTravelCE. For more information: info@iTravelCE.com or go to www.iTravelCE.com.

• **Scandinavia/Russia Cruise**

Seminar: July 6-17 aboard the Royal Princess. Attendees can earn up to 10 CE credits. Hosted by AEA Cruises, www.OptometricCruiseSeminars.com.

• **Mediterranean Cruise Continu-**

ing Education Seminar: Aug. 16-23 aboard the Royal Caribbean's Splendour of the Seas cruise to Italy, Croatia, Turkey and the Greek Islands. Dr. Scot Morris will present courses covering comanagement, glaucoma, ocular infections, optical dispensing, practice management and retinal disorders. Fourteen hours of CE are available. Hosted by the Academy of Ophthalmic Education.

Heart of America Contact Lens Society & Primary Care Congress

Optometrists in the heartland will have the opportunity to earn up to 15 hours of CE credit presented by numerous heavy-hitters on the lecture circuit during the 53rd annual Heart of America Contact Lens & Primary Care Congress. The meeting, which will also offer 11 hours of CE for paraoptometrics, will be held from Feb. 14-16 in Kansas City at the Sheraton Kansas City Hotel at Crown Center.

Topics to be covered include specialty contact lenses, glaucoma, pharmacology, pediatrics, anterior segment disorders, neurology, retinal disorders, practice management and diabetes. The congress' early-bird panel discussion, "Advancements in Eye Care Research," will feature Lyndon Jones, PhD, Jeff Gerson, OD, and Leo Semes, OD, who will review the latest hot topics in current clinical

research. The opening symposia will be "Contemporary Management of Ocular Inflammation and Allergy" by Jimmy Bartlett, OD, and "The New Normal— Getting More From Your Team in the New Era of Eye Care," by Tom Bowen, BS. In addition to continuing education, the congress also boasts the largest exhibit hall in the Midwest.

Every year, Heart of America applies for approval of CE credit in each state, simplifying re-licensure for attendees. The congress will continue to offer the OE Tracker scanning system to assist doctors in tracking their CE hours and verify attendance. Additionally, Heart of America returns almost \$100,000 to the five member state associations and other states that have 25 or more doctors attending each year.

For more information or to register, go to www.hoacsls.org.

Well beyond comfortable...
The only lens shown to be
clinically comparable to wearing

NO LENS AT ALL

ON 5 OF 6 KEY MEASURES
OF OCULAR HEALTH*†1:

- Limbal hyperemia
- Corneal staining
- Corneal vascularization
- Bulbar conjunctival hyperemia
- Papillary conjunctivitis

The sixth measure was conjunctival staining which differed between the lens wearers and spectacle wearers; however, both measures were very low and of limited clinical relevance.

1-DAY ACUVUE®
TruEye®
BRAND CONTACT LENSES

HEALTH YOU CAN SEE™

Go beyond ocular comfort
and help maintain ocular health.

*A 1-year, randomized, investigator-masked, parallel-group study of 74 subjects (aged 18-51 years) who had never worn soft contact lenses previously. Subjects were randomized to 1-DAY ACUVUE® TruEye® Brand or spectacles. Ocular physiology was assessed at 2 weeks, 1 month, 3 months, 6 months, 9 months, and 1 year using the Efron Grading Scale (a 0- to 4-point scale, with findings recorded to the nearest 0.1). $P < 0.05$ based on 2-sided 95% confidence intervals.

†The sixth measure was conjunctival staining.

ACUVUE® Brand Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Lenses should not be prescribed if patients have any eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. Consult the package insert for complete information. Complete information is also available from VISTAKON® Division of Johnson & Johnson Vision Care, Inc., by calling 1-800-843-2020 or by visiting acuvueprofessional.com.

SECO 2014 Offers 400 Hours of CE in Atlanta

In CE circles, SECO's moniker as "the education destination" comes as no surprise, given its nearly century-long track record of putting on high-caliber educational programs. And for the 2014 meeting, to be held March 12-16 at the Georgia World Congress Center in Atlanta, SECO has lined up an impressive array of education, exhibits and social events for eye care professionals at all levels.

The meeting will feature 275 OD and AOP continuing education courses that collectively represent more than 400 credit hours. The OD program comprises 137 courses, including special sessions and a high-profile symposium series. The AOP program will offer 153 courses, including the "Beginning Your Life in the World of Ophthalmics" track and 10 team-centered learning courses designed for both ODs and AOPs. Additionally, Optometry's Marketplace at SECO will showcase the latest products and technologies from more than 250 industry-leading companies and host the expanded Advanced Media Learning Center.

"SECO 2014 offers a selection of courses that were carefully crafted to provide you with the latest information across the full spectrum of eye care," says Paul C. Ajamian, OD, optometric education program development committee chair. "You

will find everything you need in one meeting to position your practice for the future. Many of our courses, especially the special sessions for which SECO has become famous, will not be available at any other meeting, so take full advantage of this unique opportunity by making SECO your education destination."

Standouts at SECO 2014 include eight special sessions totaling 16 hours of CE credit. A few of the special sessions you won't want to miss:

- **"Breaking News from Bascom Palmer,"** by Mark Dunbar, OD, and Richard Awdeh, MD. This session will provide a glimpse into what the next 50 years holds for anterior segment eye care, including advances in cataract and refractive surgery, how to treat infections in the age of microbial resistance, and mobile health technology.

- **"Brushing the Surface: New Developments in MGD, Dry Eye and Infection,"** by optometrists Tammy Than, Kelly Nichols and Kimberly Reed. The trio will cover the latest in dry eye research and infectious keratitis, including mechanisms, diagnosis, testing, meibomian gland dysfunction and contemporary treatments.

- **"Ocular Oncology from Front to Back,"** presented by Vasiliki Poulaki,

(continued on page 20)

(continued from page 19)

MD, and Anthony Cavallerano, OD. The primary care optometrist is often confronted with decisions about suspicious adnexal, anterior segment and posterior segment lesions encountered as a routine part of a comprehensive eye exam.

This session presents a logical clinical approach to the differential diagnosis of ocular tumors and helps to sort out the important findings when making clinical decisions surrounding malignant and sometimes commonplace benign ocular neoplasms.

- **“Dr. Quigley’s Glaucoma Pearls.”** Harry Quigley, MD, a renowned glaucoma clinician and researcher at Johns Hopkins, will share his expertise and practical glaucoma “pearls” with attendees during this special session, moderated by Dr. Ajamian. In it, Dr. Quigley will review his latest research on angle-closure glaucoma, optic disc and nerve fiber layer evaluation, visual field loss, and the use of medications vs. surgery in open-angle glaucoma.

SECO has also assembled numerous comprehensive tracks with topics covering traumatic brain injury, pediatrics, oral pharmacology, practice management, AREDS2 and much more.

For more information or to register, go to <http://seco2014.com>.

Atlanta Happenings

If you have a few extra hours during SECO, be sure to make some time to visit these popular Atlanta venues:

- **World of Coca-Cola:** 121 Baker Street in Pemberton Place, www.worldofcoca-cola.com. Experience a hands-on history of the world’s most famous soft drink.

- **Georgia Aquarium:** 225 Baker Street, www.georgiaaquarium.org.

Take in the world’s largest aquarium, home to tens of thousands of marine animals and other sea life.

- **CNN Studio Tour:** 190 Marietta Street NW, www.cnn.com/tour.

Enjoy a 55-minute walking tour and see what happens behind the scenes at the first 24-7 news station.

- **Centennial Olympic Park:** 265 Park Avenue West NW, www.centennialpark.com. The 21-acre park was built to celebrate the legacy of the 1996 Centennial Olympic Games.

- **Dr. Martin Luther King, Jr. National Historic Site:** 450 Auburn Avenue, NE, www.nps.gov/malu. Walk along this 35-acre site and reflect upon a significant part of American history.

Restaurants to Try

There’s more to southern cookin’ than grits! Here are the best restaurants in Atlanta, according to Yelp:

- **Bacchanalia:** 1198 Howell Mill Road NW, www.starprovisions.com/bacchanalia.php

- **Quinones:** 1198 Howell Mill Road, www.starprovisions.com/quinones-at-bacchanalia.php

- **Canoe:** 4199 Paces Ferry Road NW, www.canoeatl.com.

- **Sotto Sotto:** 309 N Highland Avenue NE, www.urestaurants.com.

- **Aria:** 490 E Paces Ferry Road NE, www.aria-atl.com.

- **Desta Ethiopian Kitchen:** 3086 Briarcliff Road NE, www.destaethiopiankitchen.com.

OPTICS

MARCH 26-30, NEW YORK CITY

Vision Expo East 2014

A flagship meeting for the optometric profession, Vision Expo East will offer more than 325 hours of continuing education this year for the thousands of attendees who will converge on New York City in late March at the Jacob Javits Center, the meeting's longstanding home. In addition to perusing the latest trends in optical fashion and lens design, attendees will learn about the latest diagnostic technologies, treatments and clinical studies that will ultimately impact their practice and their patients.

This year, one of the new and notable tracks at VEE will be "The Global Contact Lens Forum," which will provide seven hours of CE credit and will feature courses such as "Contact Lenses Yesterday, Today, and Tomorrow," by Mile Brujic, OD, Nick Rumney, OD, and Lyndon Jones, BSc, PhD, FCOptom.

Immediately preceding Vision Expo East 2014 will be a special event jointly organized by the British Contact Lens Association and Vision Expo.

The two organizations "have teamed up to present an exciting contact lens forum which will emphasize the business side of our contact lens practice," says VEE Chair Kirk Smick, OD. "Practitioners from both the US and across the pond in the UK will explore all aspects of the business side of a contact lens practice."

These classes will be presented on Wednesday afternoon and Thursday morning; the regular CE program begins immediately following on Thursday afternoon. "Attendees will leave the program saying, 'There is profit in a contact lens practice after all,'" Dr. Smick predicts.

VEE has also created an in-depth, 17-hour Glaucoma track, with lectures such as "Glaucoma and Eye Disease in Immigrant Populations," by Aaron Lech, OD, and also a 12-hour "Specialty Glaucoma" track that will include "Getting Comfortable with Glaucoma," presented by optometrists Leo Semes and Richard Madonna, and "Treatment Decisions-Part 1," by Harvey Dubiner, OD, and Michael Chaglasian, OD.

VEE will also help you steer your practice through new federal mandates in the "New Government Regulations & Healthcare Updates" track, which will offer 10 CE credits. You won't want to miss courses such as "Meaningful Use Stage 1 & 2," and "Surviving EHR Incentive Audits" by optometrists Phil Gross and Jay Henry.

Last year's AREDS2 results have created a buzz among optometrists, leaving many with more questions than answers. To address this need, VEE has created the "Macular Degeneration and Nutritional Supplements" track, which will provide 13 hours of CE credit and will include such courses as "Genetic Testing in Optometric Practice," by optometrist Ken Eckland. Another

notable course in this track is "Omega-3s in Primary Eye Care—What Should You Know Today," by John Lahr, OD.

Also new this year: VEE will co-host the annual Ocular Nutrition Society meeting, which will be held on Sunday and will feature several nationally recognized authorities on nutrition, who will present the latest research and information on nutraceuticals.

Attendees will also learn about diabetes and systemic disease, in addition to new technologies, in several custom-designed courses.

Another popular Vision Expo addition is back this year—My Show Planner, which allows attendees to personalize their meeting agenda from their mobile phone.

To learn more about Vision Expo East or to register, go to <http://www.visionexpoeast.com>.

Sightseeing in the Big Apple

New York City is global metropolis and an urban dynamo like no other, where sightseeing opportunities abound. You can't go to NYC without taking in:

Correct the vision
rather than mask the problem.

KeraSoft® IC

Treating irregular corneas with anterior aspheric optics.

For keratoconus and other corneal irregularities, KeraSoft® IC provides vision correction by using anterior aspheric optics, and “drapes” over the cornea rather than using thickness of material to “mask” the irregularity. The patented design is customizable and offers balanced overall thickness with spherical aberration control. It features an adjustable periphery, allowing the lens to fit most any corneal shape. Made of silicone hydrogel* and with a Dk of 60, KeraSoft® IC soft contact lenses provide a comfortable option for your patients with irregular corneas.

Only available from your authorized KeraSoft® IC laboratories. Visit kerasoftic.com for details.

New DQI provides automated graph quality based on a familiar Green-Yellow-Red scale.

The NEXT GENERATION in Macular Pigment Measurement:

QuantifEye[®] MPS II

Since 2006, the original *QuantifEye* macular pigment measurement instrument has been the industry standard backed by science with more than 4-million eyes accurately measured.

The new *QuantifEye* MPS II offers significant software enhancements including:

- ~ Unsurpassed technician usability with a new Data Quality Index (DQI)
- ~ Significantly faster time in the lane with enhanced features and user-interface
- ~ Intuitive workflow with multiple reports

Request a demo and special introductory pricing by visiting www.quantifeye.com/mps2

APRIL 4-6, BOSTON

Retina Update 2014 from the ORS

At the annual meeting of the
Optometric Retina Society (ORS),
held in conjunction with **Review of
Optometry** April 4-6 in Boston, a
panel of experts will present the lat-
est clinical updates in retinal disease
care. Attendees will be able to earn
15 hours of CE credit.

"This unique, comprehensive
program focuses on current and
future diagnostic and management
strategies for posterior segment dis-
eases," says ORS President Joseph
Pizzimenti, OD. "The primary eye
care clinician will come away with
valuable, clinically relevant informa-
tion that can be used immediately in
everyday practice."

Featured speakers are optom-
etrists Leo Semes, Mark Dunbar and
Brad Sutton, in addition to ophthal-
mologist Clement Trempe. Presenta-
tions include:

- The ABCs of Retinal Disease
- What's New in Retinal Imaging?

- Nutrition and Genetics in Retinal Health
- Holy Macula! The Vitreoretinal Interface
- Optometric Retina Society: Choroid Chronicles
- Retinal Vascular Disease Update
- Tales From the Trenches
- Not Your Grandpa's Low Vision Course
- The Posterior Segment in Diabetes
- Treatment and Comanagement of Retinal Disease

Dr. Pizzimenti says the meeting
will appeal to both general op-
tometrists looking to improve their
understanding of retinal disease and
to those with a particular interest in
retina who'll be looking for cutting-
edge topics and education.

CLSA 59th Annual Meeting

It's estimated that 36 million Americans wear contact lenses. From the continued evolution of daily disposables to clinical breakthroughs in improving conditions such as keratoconus through collagen cross-linking, it is essential for their doctors to keep up to date.

With this in mind, the 59th Annual Education Meeting of the Contact Lens Society of America (CLSA) will offer the latest information on contact lenses and clinical research during its meeting, scheduled from April 24-26 at the Hilton Savannah DeSoto in Savannah, GA. Attendees will be able to earn up to 22 hours of CE credit.

"The Contact Lens Society of America Annual Education Meeting offers something for everyone interested in the contact lens field,"

says CLSA education chair Michael A. Ward, MMSc, FAAO, FCLSA. "The CLSA program offers a full spectrum of education, including a 'Contact Lens Bootcamp' for those eager to learn the basics of lens fitting and dispensing, along with a wide range of advanced topics such as new lens technologies, scleral lens fitting, custom soft lens design and myopia control. I encourage all who are interested in contact lenses to attend the CLSA meeting to realize the potentials of current contact lens technologies."

Featured speakers include Patrick Caroline, OD, Craig Norman, FCLSA, Michael Ward, FCLSA, Jason Jedlicka, OD, Brooke Messer, OD, Edward Bennett, OD, and Stephen Byrnes, OD. For more information or to register, go to www.clsa.info.

Indiana Optometry Convention

HOST: Indiana Optometric Association

**MWCO Meeting Offers 24 Hours
of CE at Caesars Palace**

Optometrists will have the opportunity to earn 24 hours of continuing education credit over three days—fulfilling total annual CE requirements for many—during the 2014 Mountain West Council of Optometrists' Annual Congress. The meeting will be held in Las Vegas at the legendary Caesars Palace Hotel from April 24-26.

"This year's congress provides a broad-based educational program to better enable our attendees to provide exceptional care for their patients for many years to come," says optometrist Robert Wooldridge, MWCO education chair.

The meeting will feature several leading speakers on the lecture circuit who will cover a wide variety of clinical topics.

Margie Recalde, OD, will provide updates on anterior and posterior segment diseases such as Demodex blepharitis, dry eye and Sjögren's syndrome.

Optometrist Mark Dunbar will

present on new treatments for AMD.

Attendees can learn more about contact lenses and corneal concerns at lectures by Drs. Melissa Barnett and Carl Spear.

Drs. Richard Madonna, John McSoley and Wooldridge will be speaking on diagnosis and management of glaucoma, including the latest updates on instrumentation and medical and surgical treatments. How to use and interpret OCT findings in glaucoma and retinal diseases will also be covered in detail.

Kim Reed, OD, will address the impact of obesity and other systemic health issues in patients and the most important nutritional supplements in their care.

Bruce Onofrey, OD, RPh, will also review nutraceuticals in eye care along with management of ocular infections and other emergencies.

Always a crowd favorite, John McGreal, OD, will review the latest trends in contemporary medicine and give an introduction to the new ICD-10 coding system.

CE in Italy

Optometric CE opportunities aren't just restricted to US venues. In recent years, they've gone global. The CE in Italy meeting series offers optometrists the chance to gain continuing education credits at courses presented by esteemed doctors in some of the most beautiful locations in the world.

"One of the things that makes this conference so appealing is the fact that it's a great venue, whether it is one's first trip to Italy or tenth," says conference host James Fanelli, OD. The spring and fall session locations are carefully selected, including popular cities such as Rome, Florence and Venice for the first-time traveler, and more unique spots such as the Italian Alps and a small hilltop village in Tuscany for the seasoned visitor looking to sight-see off the beaten path.

The CE program begins early in the mornings and finishes early as well. "There are no afternoon sessions," Dr. Fanelli says, "so, once the day's continuing education is complete, the participants are free to explore or relax for the entire day and don't have to be back in class

until the next morning." In addition to organizing the educational program, Dr. Fanelli provides advice on hotels, driving itineraries, tourist attractions and even "local restaurants and specialty dishes, wineries and olive oil producers."

The spring and fall meetings will have separate educational components consisting of 12 CE credits each. Doctors can register for either program for one fee, or both programs in either the spring or fall at a reduced rate.

To register, or to get more information on the meeting or hotels, go to www.CEinItaly.com.

The CE in Italy meeting dates and locations are:

- **SPRING 2014 MEETINGS:**

- Rome, Italy — May 2-4

- Vienna, Austria — May 14-17

- Salzburg, Austria — May 18-20

- **FALL 2014 MEETINGS:**

- Rome, Italy — Sept. 21-23

- Florence, Italy — Sept. 25-27

- Castiglion Fiorentino, Italy —

- Sept. 28-30

It’s not a stretch to consider op-
 tometrists Ron Melton and Randall
 Thomas to be rock stars on the lec-
 ture circuit. For years, the joint pre-
 sentations by these North Carolina
 natives have easily and consistently
 drawn some of the biggest crowds.
 Chalk it up to the unique combina-
 tion of their clinical prowess and
 highly original lecture style.

“All of our material is focused
 on presenting clinically relevant
 information in an enjoyable format of
 ‘team-teaching,’ which we pioneered
 over 25 years ago,” Dr. Thomas says.

The lecture content combines their
 decades of experience with a timely
 review of the scientific literature. “We
 draw from intensive clinical practice
 over our combined 65 years in the
 trenches. This clinical seasoning is
 augmented by our monthly perusal
 of several professional journals, and
 therefore we strive to make our
 teaching as up-to-date as possible.”

The goal, says Dr. Thomas, “is to
 help every optometric physician
 practice in a highly competent, com-
 prehensive manner.”

*The always-in-demand duo have many commitments scheduled in 2014—
 and more will be added throughout the year. Here’s a list of their confirmed
 appearances known at press time:*

BCLA Annual Conference

“What Will You Take Away?” is the theme of the 38th British Contact Lens Association (BCLA) Clinical Conference & Exhibition, scheduled for June 6-9 at the International Convention Centre in Birmingham, UK. The BCLA has added new elements this year to ensure its delegates “take away” fresh skills and strategies to put into practice, including more hands-on workshops and a greater focus on everyday contact lens practice issues such as comfort, keratoconus and myopia control.

Keynote speakers include 2014 BCLA Medalist Philip Morgan, BSc, PhD, MCOptom (UK), who will present “Changing the World with Contact Lenses.” Dr. Heiko Pult, MSc, PhD (UK), will present the Irving Fatt Memorial Lecture, “Clinical Evalua-

tion of Dry Eye: A Year of Research.” Other keynote speakers: Lyndon Jones, BSc, PhD (Canada), Motozumi Itoi, MD, PhD (Japan), and Bruce Evans, BSc, PhD (UK).

There will be an enhanced program of CET workshops running for the four days of the conference, with some repeated to ensure as many delegates can attend as possible. Workshop topics will include IOLs, laser refractive surgery, scleral lenses, and dry eye assessment and management. Peer-review discussion groups, for which delegates must pre-register, will also take place each day, offering three CET points each.

For more information or to register, go to www.bcla.org.uk or contact Sarah Greenwood at conf@bcla.org.uk.

JUNE 25-29, PHILADELPHIA

More Than 225 CE Hours Offered at Optometry's Meeting

Optometry's Meeting, sponsored by the American Optometric Association, is always a major draw for optometrists. This year, attendees will have the opportunity to take advantage of more than 225 hours of continuing education credit and an additional half-day of CE. The 2014 meeting will take place in Philadelphia from June 25-29, and the educational portion of the meeting will be extended from Wednesday, June 25, through Saturday, June 28. The meeting will be held in the Pennsylvania Convention Center in the heart of Philadelphia's downtown.

Olympic Gold medalist and cancer survivor Scott Hamilton—whose motto is “the only disability in life is a bad attitude”—has been invited to be the keynote speaker during the Wednesday opening general session, which is sponsored by Essilor.

The meeting will also offer “Product and Technology Exchange Sessions,” where companies will present their products or services. These sessions do not count toward CE credit. Attendees will receive a gift card or

a similar incentive for attendance.

In addition to ample CE and other educational opportunities, the meeting will feature 200-plus exhibits. Exhibit hall hours are: Thursday 4:00 pm – 7:30 pm, Friday 10:00 am – 5:00 pm and Saturday 9:30 am – 2:00 pm.

Optometry's Meeting 2014 will also host more than 50 special

events. The Celebration of Optometry (Presidential Celebration) will take place in the Philadelphia Convention Center ballroom Saturday evening; it is sponsored by Hoya. An Optometry Cares 5K run/walk will take place on Saturday morning.

Also new this year: the majority of the student program will be incorporated into the OD program, except for a few sponsored student courses and events. Additionally, the House of Delegates will meet all day Thursday, with no House of Delegates meeting on Friday. Saturday's House of Delegates schedule is expected to

remain the same as in previous years.

Registration and housing opens in February. The education, exhibit hall and most ballroom events will be located in the Pennsylvania Convention Center. House of Delegates, affiliate/miscellaneous meetings and alumni receptions will be located at the Marriott Downtown, Loews and Marriott Courtyard hotels.

For more information and to register, go to: www.optometrymeeting.org.

Much to Love in the City of Brotherly Love

While at the AOA meeting, take a few minutes and visit some of Philadelphia's many attractions:

- **Liberty Bell Center:** Independence Mall, 525 Market Street, www.nps.gov/inde/liberty-bell-center.htm

This 2,080-pound piece of history was once mounted in the belfry of Independence Hall. It was rung to mark important historic events, most notably at the first public reading of the Declaration of Independence.

- **Independence Hall:** 520 Chestnut Street, www.nps.gov/inde/index.htm

This red-brick Georgian-style building is where the Declaration of Independence and the Constitution were debated, drafted and signed by

(continued on page 40)

IN THE NEW ERA OF MANAGED CARE,
WHAT'S YOUR PLAN
TO WIN:

- More Patients
- More Profits
- More Time
- All of the Above

Go To **VisionSourcePlan.com** and
We'll Give You Ours

(continued from page 38)

America's forefathers.

• **Philadelphia Museum of Art:**

26th Street and Benjamin Franklin Pkwy, www.philamuseum.org

This world-class art museum was made famous by Matisse, Van Gogh, Picasso—and Rocky Balboa. Run up the famous stairs and pump your fists in triumph, then go inside to check out the masterpieces.

• **Rittenhouse Square:** 18th and Walnut streets

This popular neighborhood features top-notch restaurants, high-end stores and hip nightlife venues.

• **Reading Terminal Market:** 12th and Arch Streets, www.readingterminalmarket.org

This market, located beneath the Reading Railroad's 1891 train shed, hosts almost 100 different local food vendors.

• **Eastern State Penitentiary:** 2124 Fairmount Avenue, www.eastern-state.org

The oldest US prison still standing. Although it was shut down in the 1970s, visitors can tour the facility, including Al Capone's cell.

• **Please Touch Museum:** 4231 Avenue of the Republic, www.pleasetouchmuseum.org

Travel to Wonderland with Alice, practice your reading skills in the Story Castle and hone your science skills in the lab at this popular hands-on museum.

• **Masonic Temple:** 1 North Broad Street, <http://pagrandlodge.org/home.html>

The stone temple, one of the largest of its kind, was once the meeting place of one of history's more legendary organizations.

• **Philadelphia Zoo:** 3400 West Girard Avenue, www.philadelphiazoo.org

The Philadelphia Zoo is the oldest zoo in the country and today is the home to almost 2,000 animals.

• **Franklin Institute Science Museum:** 222 North 20th Street, www2.fi.edu

During your visit, check out the Sports Challenge, which explains the science behind sports such as surfing and rock climbing with the help of simulators. If space is more your thing, check out the Fels Planetarium.

Go Beyond Cheesteaks

If you're ravenous after a full day of CE during the AOA's annual meeting, your options for great food are plentiful. Take a pass on the cheesesteaks and dine in style at one of these top

10 Philadelphia eateries recommended by Yelp:

• **Amada:** 217 Chestnut Street, philadelphia.amadarestaurant.com

• **Vetri:** 1312 Spruce Street, www.vetriristorante.com

• **Zahav:** 237 St. James Place, www.zahavrestaurant.com

• **Bibou:** 1009 S. 8th Street, www.biboubyob.com

• **Morimoto:** 723 Chestnut Street, www.morimotorestaurant.com

• **Vernick Food & Drink:** 2031 Walnut Street, www.vernickphilly.com

• **Buddakan:** 325 Chestnut Street, www.buddakan.com

• **Modo Mio:** 161 W. Girard Avenue, www.modomiorestaurant.com

• **Barbuzzo:** 110 S. 13th Street, www.barbuzzo.com/barbuzzo

• **Alma De Cuba:** 1623 Walnut Street, www.almadecubarestaurant.com/

Late-breaking Additions

Organizers of several meetings in 2014 will be finalizing specifics as their event date nears. Be sure to check back on the following events from the University of Houston College of Optometry (<http://ce.opt.uh.edu>) for further details as they become available.

• **CE in Forth Worth:** Scheduled for the fall. This meeting will take place at Alcon Laboratories, 6201 South Freeway, Fort Worth, TX, and will offer 16 CE credits. Exhibits included.

• **CE in Houston:** Date TBA. Attendees will be able to earn up to 16 CE credits at the meeting, which will be located at the UHCO-HBSC, 4901 Calhoun Road, Houston, TX. Exhibits included.

• **Everything Retina Symposium:** Scheduled for November 2014 at the Westin Riverwalk Hotel, 420 W. Market Street, San Antonio, TX. Sixteen CE credits will be available. Exhibits included.

• **Optometry Board Certification Examination Review Courses:** Scheduled for spring and fall of 2014 and hosted by KMK Education Services in cooperation with the University of Houston. The meeting

will take place at UHCO-HBSC, 4901 Calhoun Road, Houston, TX. Exhibits included.

• **West-Texas Two Step:** Scheduled for spring 2014 at the Embassy Suites, 5215 S. Loop 289, Lubbock, TX. The meeting will offer 16 hours of CE and exhibits will be included.

• **What's New at the U?:** Scheduled for fall 2014 at UHCO-HBSC, 4901 Cahoun Road, Houston, TX. Sixteen CE credit hours available and exhibits will be included.

*Δ=Prism diopter. Numbers represent the mean vertical prism.

†Potential binocular disturbances caused by induced vertical optic prism dissociation is a relevant factor for practitioners to consider when fitting toric contact lenses for monocular astigmats or those requiring a mix of toric soft contact lens designs. Clinical studies have not been done to fully characterize the clinical effects of differences in base-down prism among different contact lenses.

Contact lenses and lens prism are for illustration purposes only.

ACUVUE® Brand Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Lenses should not be prescribed if patients have any eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. Consult the package insert for complete information. Complete information is also available from VISTAKON® Division of Johnson & Johnson Vision Care, Inc., by calling 1-800-843-2020 or by visiting acuvueprofessional.com.

Vision Expo West: 350 Hours of CE

It's not just about frames. The twin Vision Expo conferences have emerged as major contenders in the CE meeting arena in recent years.

Case in point: Vision Expo West, which will be held from Sept. 17-20 at the Sands Expo & Convention Center in Las Vegas, will offer attendees 350-plus hours of continuing education developed by a conference advisory board representing some of the most renowned leaders in the profession. And many of the courses developed for 2014 will offer myriad opportunities for team learning that will engage and empower your entire optometric staff.

"The Vision Expo meetings are the only meetings where all members of the eye-care team sit side-by-side and learn together," says optometrist Kirk Smick, VEW chair.

In addition to team learning, VEW will also offer a special 14-hour glaucoma track that will highlight the most current thinking in the disease's diagnosis and treatment. "Technology and pharmaceuticals have changed dramatically over the last five years, and recognized experts from optometry and ophthalmology will bring us up to date," Dr. Smick says.

Spectacle lens design technology

is changing at a rapid pace. With that in mind, Vision Expo has created a "Lens Specialist Track" that will provide both the optometrist and optician with the latest on lens designs and coatings so they will have an easier time prescribing the best lens possible for the patient.

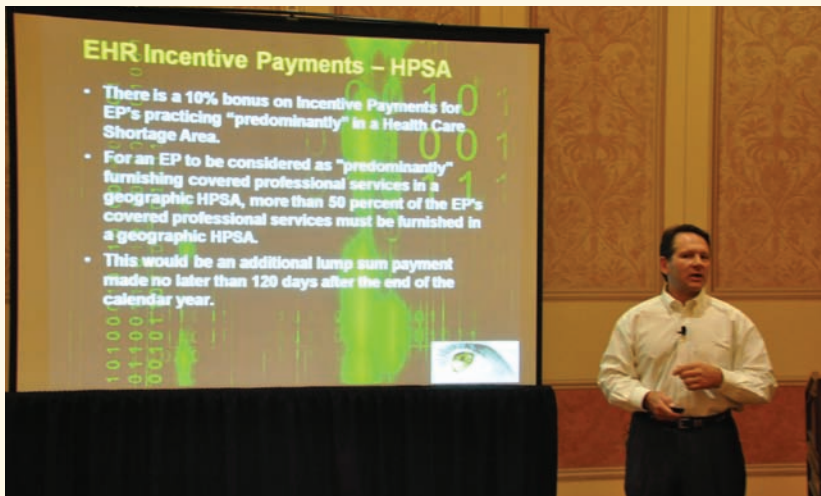

In government affairs, the alphabet soup of acronyms and new mandatory regulations are often hard to decipher, let alone to navigate. Vision Expo will help cut through the red tape with a new "Government Regulations" track, featuring courses on electronic health records, "meaning-

ful use," pediatric care in the Affordable Care Act, and other sessions that will help guide your practice through the often complicated maze of new government regulations.

Your practice's business needs and your patients' expectations are evolving. Discover how you can keep up, with the "CXO" track, which will show you how the position of Chief Experience Officer has become a major player in the business world—and health care is no exception. "Make someone in your office directly responsible for this most important task," Dr. Smick advises.

Also on the practice management end, the members of your staff responsible for purchasing frames need to make the best buying decisions possible. The "Frame Buyers Track" is a must for these team members, who will get the latest tips and resources to help boost this important part of your practice's bottom line.

Finally, many optometrists have added nutraceuticals to their patient care efforts. However, the AREDS2 study has left many questions about ocular vitamins unanswered. VEW will offer several courses to help you learn what nutraceuticals to recommend to your patients based on the most recent scientific data.

For more information about Vision Expo West or to register, go to www.visionexpowest.com.

Sightseeing Options

Las Vegas is renowned—some would say infamous—for its casinos and gambling. But the desert oasis offers much more than just one-armed bandits for nightly entertainment. From a gondola ride at the Venetian to a panoramic view of the city atop the Eiffel Tower at Paris, the glitz and glam of Sin City offers diversions to entice you away from the tables.

While at VEW, be sure to visit these Las Vegas originals:

- **The Mob Museum:** 300 Stewart Avenue, <http://themobmuseum.org>

Located in the heart of downtown Las Vegas, the Mob Museum showcases both sides of the notorious battle between organized crime and law enforcement.

- **Caesars Palace:** 3570 S. Las Vegas Blvd. www.caesarspalace.com.

A visit to this legend is what “doing Vegas” is all about.

- **Fountains of Bellagio:** 3600 Las Vegas Blvd., www.bellagio.com/attractions/fountains-of-bellagio.aspx

More than a thousand fountains at the Bellagio dance to music ranging from Pavarotti to Sinatra. Enjoy the show—for free!

- **O, by Cirque du Soleil:** O Theatre, 3600 S. Las Vegas Blvd., www.cirquedusoleil.com/en/shows/o/default.aspx

An ethereal, visually stunning show that incorporates the elements of air, fire and—most prominently—water.

- **Stratosphere Tower Thrill Rides:** 2000 Las Vegas Blvd., www.stratospherehotel.com/Tower/Rides.

All rides are at the top of the Stratosphere Tower, over 900 feet high.

- **Shark Reef Aquarium, Mandalay Bay:** 3950 S. Las Vegas Blvd., www.sharkreef.com

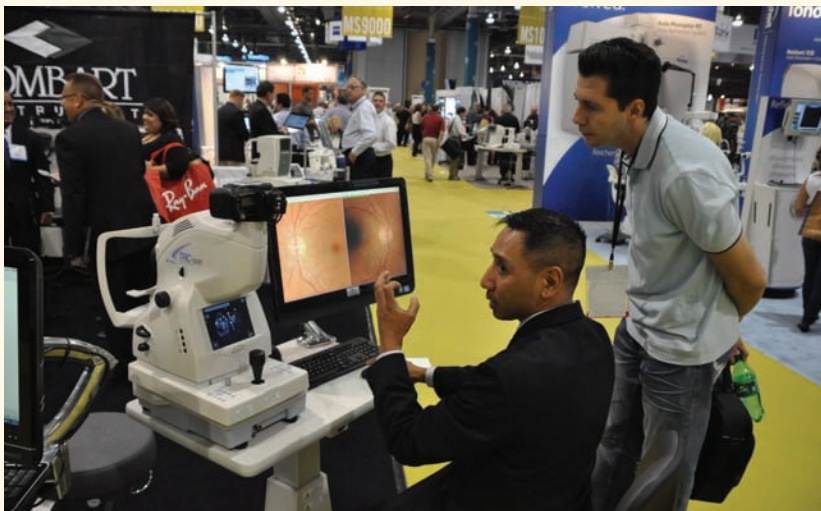

A trip to the Shark Reef at Manda-

lay Bay takes guests on a 14-exhibit journey through a jungle environment into a sunken shipwreck where they will see 2,000 animals, including some of the most dangerous predators in the world.

Beyond the Buffet

Leave the all-you-can-eat buffets to the tourists and you’ll find that Las Vegas is a foodie’s delight, with celebrity chef venues and some of the country’s best steakhouses. Here are the top 10 Las Vegas eateries, according to Yelp:

1. **Lotus of Siam:** 953 E. Sahara Avenue, www.saipinchutima.com
2. **Joël Robuchon:** 3799 S. Las Vegas Blvd., www.joel-robuchon.net
3. **Picasso:** Bellagio Hotel, 3600 Las Vegas Blvd. S, www.bellagio.com
4. **L’Atelier de Joël Robuchon:** 3799 South Las Vegas Blvd., www.mgmgrand.com/restaurants/atelier-joel-robuchon-french-restaurant.aspx
5. **Eiffel Tower Restaurant:** 3655 Las Vegas Blvd. S, www.eiffeltower-restaurant.com
6. **Tom Colicchio’s Craftsteak:** 3799 Las Vegas Blvd. S, www.craftrestaurantsinc.com/craftsteak-las-vegas
7. **Gordon Ramsay Steak:** 3655 Las Vegas Blvd. S, www.parislasvegas.com/restaurants/gordon-ramsay-steak.html#UpuLJ449Xdk
8. **Sage:** 3732 Las Vegas Blvd. S, www.ariaslasvegas.com/dining/restaurants/sage
9. **Mon Ami Gabi:** 3655 Las Vegas Blvd. S, www.monamigabi.com/home/?loc=vegas
10. **Bouchon:** 3355 Las Vegas Blvd. S, bouchonbistro.com/lasvegas

Go Further—Without Leaving Home

Expand your clinical skills and catch up on your CE requirements, all from the comfort of your own home.

Review offers **nearly 100 hours** of COPE-approved continuing education — right now! It's **just a click away**. Our extensive library of exams runs the gamut from keratoconus to fundus autofluorescence, and everything in between.

OCTOBER 9-12, PORTLAND, OR

GWCO Congress 2014

The Great Western Council of Optometry invites optometrists, allied ophthalmic professionals and optometry students to its 2014 Congress in Portland, OR. The meeting will be held from Oct. 9-12. This year's congress offers a strong line-up of speakers, including optometrists Charles Brownlow, Ben Gaddie, Nancy Torgerson and Eric Schmidt. The congress will include 90+ hours of CE, a Rocktometry Exhibit Hall of Fame, daily lunches and evening

events.

"We are pleased to offer new and exciting lecture topics for optometrists and their staff from some of the leading presenters around the nation," says GWCO President Sue E. Lowe, OD, FCOVD.

The meeting will also offer exhibits, events for students and residents and industry-sponsored seminars. For more information or to register, go to www.gwco.org.

OCTOBER 9-12, CLEVELAND

EastWest Eye Conference

The 17th annual EastWest Eye Conference will remain true to its commitment to provide world-class education to both doctors and staff by offering more than 250 hours of education during its 2014 meeting, scheduled from Oct. 9-12 in Cleveland. The conference will feature presentations by many optometric leaders, including Ron Melton and Randall Thomas, Paul Ajamian, Jerry Sherman, Gary Gerber, Ben Gaddie, Danica Marrelli, Murray Fingeret, Jim Thimons, Leo Semes, John McGreal, Al Kabat, Bruce Onofrey, Andy Gurwood, Marc Myers and many more.

The meeting location is Cleveland, Ohio's Global Center for Health Innovation and Cleveland Convention Center—a state-of-the-art facility designed specifically for medical education.

In addition to CE, the 2014 EastWest Eye Conference planners didn't forget about entertainment. The EastWest Eye Conference will once again take over a local landmark for the Friday Night Rock and Roll Hall of Fame Party.

CONTINUE YOUR EDUCATION WITH REVIEW

OUR FLAGSHIP TITLE, *REVIEW OF OPTOMETRY*, IS THE MARKET'S LEADING RESOURCE FOR ALL OF YOUR OPTOMETRY NEEDS.

Review of Optometry is your primary source for ground-breaking clinical information as well as timely news, market trend information and continuing education programs.

Review of Cornea & Contact Lenses serves as a valuable resource for all practitioners and features detailed articles focusing on various fitting methods, solutions and corneal cases. Also available is the *Review of Cornea & Contact Lenses "Annual Contact Lenses & Lens Care" Guide*, a yearly publication detailing the newest lenses and lens care products.

The *Review* Group's *Ophthalmic Product Guide* brings you the newest and most innovative products on the market. Published every February and July, the guide provides concise information about new literature, drugs and equipment designed to help your practice thrive.

The *Review* Group also offers valuable **Continuing Education** sessions in both print and online formats, allowing a convenient way for you to earn **CE credits**. In addition, *Review* also offers an impressive fleet of **free e-newsletters**, such as *Optometric Physician*, the *Optometric Retina Society* quarterly e-newsletter and the *Optometric Glaucoma Society E-Journal* so you can keep up to date on breaking news and the latest research online.

The Review Group is dedicated to the constant growth and education of the profession. Review offers many different publications and services to help enhance your practice and patient care.

On top of these products, the *Review* Group also spearheads meetings and conferences, bringing together experts in the field and providing a forum for practitioners to earn CE credits and learn from others in the profession.

Academy 2014 Elevates the Profession

The mile-high city will host the American Academy of Optometry's annual meeting, a much-anticipated event featuring some of the brightest and most innovative leaders in the field, who will shine a light on where the future of optometry is heading.

AAO's 2014 meeting, to be held from Nov. 12-15 at the Colorado Convention Center in Denver, will allow attendees to earn 35 hours of CE credit.

"The Academy strives to deliver an energetic annual meeting that brings together practitioners, residents, students and others to interface with optometry's foremost educators, vision researchers, and clinical specialists in our profession," says optometrist Brett Bence, FFAO, president-elect of the AAO board of directors. "We serve as a very large forum for exchange of knowledge. We hold a commitment to provide our members and profession a platform for dissemination of the latest ophthalmic research that impacts patient care."

Always a stand-out at the Academy meetings, the Monroe J. Hirsch Research Symposium for 2014 will be

"Mechanisms of Presbyopia Correction—Beyond Benjamin Franklin," where speakers conducting basic, optical and clinical research will discuss advances in understanding the underlying mechanism and cutting-edge treatments for presbyopia. Presenters include Stephen D. McLeod, MD, Paul L. Kaufman, MD, and Susana Marcos, PhD.

The 'Ezell Fellows Present' series, another favorite feature of the Acad-

emy meeting, will focus on low vision, with presentations by Robert Massof, PhD, FFAO, Susana Chung, OD, PhD, FFAO, and Bradley Dougherty, OD, PhD, FFAO.

"Why do we need another photoreceptor? Clinical implications of melanopsin-containing retinal ganglion cells" is the topic for the ARVO/AAO Joint Symposium where attendees will hear first-hand the latest research that will provide evidence that "intrinsically photosensitive retinal ganglion cells" (ipRGCs) play a role in mediating the effect of light on learning, memory, metabolic function, proper retina development and photophobia. Speakers include Ignacio Provencio, PhD, David Copenhagen, PhD, Paul Gamlin, PhD, and Andrew Hartwick, OD, PhD, FFAO.

For 2014, the AAO is considering an expansion of the "hot topics" sessions, where fresh, peer-reviewed progressive research that has immediate clinical application is highlighted, Dr. Bence says.

As technology evolves, the latest innovations will also be a key point of discussion at the 2014 meeting.

(continued on page 60)

(continued from page 59)

"We continue to marvel at the innovative technologies from our industry partners that enable us to make more accurate diagnosis and treatment decisions," Dr. Bence says. "Every year, the Academy emphasizes the scientific and clinical basis of this new information as we advance our profession."

For more information, or to register, go to www.aaopt.org.

Ancillary Meetings

Several specialty organizations hold their own annual meetings during or prior to the Academy. Mark your calendars for the following:

Optometric Council on Refractive Technology (pictured below): The OCRT's 11th Annual Refractive Technology symposium will be held the day before Academy 2014 Denver. The brightest minds in cornea and lens-based refractive technologies will discuss the latest innovations and trends in refractive correction. The meeting is interactive, providing a unique forum to share ideas, thoughts and experiences with colleagues.

Attendees can expect to learn the up to date information about refractive technology and surgery, including laser vision correction,

intraocular lenses, laser-assisted cataract surgery, keratoconus surgical options, plus other advanced and investigative vision correction procedures and devices, says Chris Freeman, OD, president of OCRT. "The dynamic format and top-notch, renowned speakers make it memorable and rewarding to hear from many optometric leaders in anterior segment, all in one day," he says.

Eight hours of COPE-approved CE will be awarded to attendees. The high caliber of the day's educational content and faculty, with meals included and eight CE hours earned for a very low price of \$200, also makes it one of the most valuable as well as one of the best educational experiences, Dr. Freeman says.

For more information go to www.ocrt.org or contact Dr. David Geffen at dig2020@aol.com.

Ocular Nutrition Society: Join the ONS as it explores recent studies and delves into the many benefits of nutraceuticals that support the prevention and control of ocular and systemic disease during the ONS's 2014 Educational Symposium, which will be held on Nov. 11. Six hours of COPE-approved CE credit will be awarded for attendees. For more information, go to www.ocularnutritionociety.org, or contact Dr. Jeffrey Anshel at ocularnutritionociety@gmail.com.

Armed Forces Optometric Society:

The AFOS meeting will be held on Nov. 10 at the Denver Marriott City Center & Colorado Convention Center and will offer six hours of COPE-approved CE credit. Topics that will be covered include corneal/conjunctival disease, diabetes, glaucoma, neuro-ophthalmic disorders, pharmacology, retinal disorders, refractive surgery, systemic disease and uveitis. For more information, go to www.afos2020.org or contact Gina Borgognoni at execdir@afos2020.org.

Optometric Glaucoma Society:

The OGS will hold its annual scientific meeting on Nov. 11. The meeting is invitation only and offers eight hours of CE credit. Contact Michael Chaglasian, OD, at MChaglas@ico.edu. For more information, go to: www.optometricglaucomasociety.org/.

Tourist Attractions

Whether you get to town a day early or can only spare a few hours between CE courses, Denver offers a wealth of attractions. Be sure to include these must-sees on your itinerary:

• **Denver Art Museum:** 100 W. 14th Ave. Parkway, www.denverartmuseum.org. Boasts one of the world's greatest collections of Western American art.

• **16th Street Mall:** <http://16thstreetmalldenver.com>.

The one-mile-long 16th Street Mall is home to a diverse collection of more than 500 retailers, restaurants and bars.

• **Denver U.S. Mint:** 320 West Colfax Avenue, www.usmint.gov/mint_tours/?action=startreservation. See how money is made!

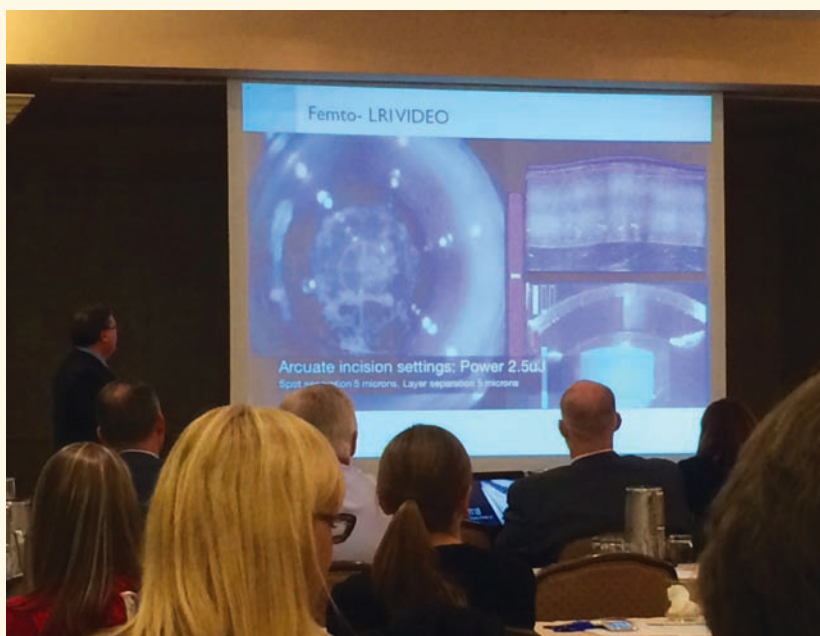

• **Denver Zoo:** 2300 Steele Street, www.denverzoo.org

Home to 3,500 different animals, representing more than 650 species.

• **Denver Performing Arts Complex:** 1245 Champa Street, <http://artscomplex.com>

Hosts Broadway blockbusters, Tony Award-winning theatre, ballet, opera and symphony.

• **Denver Botanic Gardens:** 1007 York Street, www.botanicgardens.org

THE RICK BAY FOUNDATION

for Excellence in Eyecare Education

www.rickbayfoundation.org

Support the Education of Future Healthcare & Eyecare Professionals

About Rick

Rick Bay served as the publisher of *The Review* Group since 1991.

To those who worked for him, he was a leader whose essence was based in a fierce and boundless loyalty.

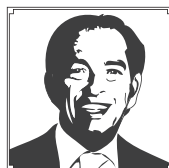

To those in the industry and the professions he served, he will be remembered for his unique array of skills and for his dedication to exceeding the expectations of his customers, making many of them fast friends.

Scholarships will be awarded to advance the education of students in both **Optometry** and **Ophthalmology**, and will be chosen by their school based on qualities that embody Rick's commitment to the profession, including integrity, compassion, partnership and dedication to the greater good.

THE 2014 SECO SHOW DAILY!

The SECO conference, one of the premier educational events of the year, will take place March 12-16, 2014 — and *Review of Optometry* will be there! *Review's* on-site editorial staff will provide live daily coverage of important show news and events, educational highlights, product launches and more.

Attendees on-site can pick up the SECO Daily each morning for the latest news and highlights. Those at home can stay in touch, too—a digital edition of the SECO Daily will be posted online, plus an e-newsletter will be sent out each morning with the day's top stories.

Show copies will also be available at *Review of Optometry* booth #613.
